Dear Client

I am writing to express my interest in the role at your company. As a highly experienced, responsible, and passionate Full Stack Engineer, I am confident that I have the skills and experience necessary to make a significant contribution to your team.

With over 10 years of experience in the industry, I have a proven track record of delivering innovative solutions that meet and exceed customer expectations. My expertise in React.js, Vue.js, Angular, Golang, Node.js, and Rust, combined with my passion for delivering high-quality and scalable solutions, makes me a strong candidate for this position.

At Neusis, I was responsible for delivering web-based solutions that increased efficiency and streamline processes for clients, utilizing React.js, Vue.js, and Angular 1/2. Additionally, I designed and launched mobile apps that improved user experience and engagement, using React Native. I am also highly skilled in building robust and scalable backend systems, having integrated Restful/GraphQL APIs and third-party APIs to enhance functionality and support business growth.

At Clarus R&D, I led the development of a highly successful hotel/flight reservation system that exceeded customer expectations and drove growth. I also designed and executed business logic, backend APIs, and security features for a ticket reservation system and Tax credit service, resulting in improved security and reliability.

At GigLabs, I was responsible for designing and implementing highly secure and reliable EVM smart contracts using Solidity. I also engineered scalable databases, developed robust backend APIs, and integrated Web3 into backend and dApp side to enhance functionality and support business growth. Additionally, I utilized Rust and Anchor framework on Solana to deliver high-performance solutions that exceeded customer expectations.

I am eager to bring my skills, experience, and passion to your company, and I am confident that I can make a positive impact in this role. Thank you for considering my application. I look forward to the opportunity to further discuss my qualifications and how I can contribute to your team.

Sincerely,

Travis
