PROFESSIONAL SUMMARY

Experienced, Responsible and Passionate Full stack/Blockchain engineer. Always focusing to business value and customer view and love to work with Team and Customers. For 10 years I implemented a lots of customer requirements and made significant contributes to business values. Recently focusing on blockchain smart contract/dApp implementation using solidity/rust/cadence and web3 technologies.

AREAS OF EXPERTISE

Restful API implementation	Frontend UI Implementation	Code review & Testing
3 rd party API Integration	Smart Contract Development	DevOps
System Analysis & Design	Web3 Integration	Networking
DB Design & SQL	Arbitrage Bot	Cloud Service
Hotel/Flight Booking System	Project Planning & Management	

WORK EXPERIENCE

Neusis May 2012 - Feb 2017

Web/Mobile Developer

- Responsible to implement web based solutions/tools using react.js, vue.js and angular 1/2
- Responsible to implement various mobile apps using React Native
- Responsible to implement backend logic, Restful/GraphQL APIs, 3rd party API integration using Golang/Node.js

Clarus R & D Mar 2017 - Feb 2020

Fullstack Engineer

- Responsible to lead developers to build hotel/flight reservation system and design architecture/database/security, integrated APIs and managed project schedule and delivery using golang and nodejs
- Responsible to implement business logic, backend APIs and security part of ticket reservation system and Tax credit service using golang
- Responsible to implement frontend part of hotel/flight reservation system and tax credit service using React.js and vue.js.
- Responsible to implement test cases for backend logic and react components.

GigLabs

Jan 2020 - Dec 2022

Fullstack/Blockchain Engineer

- Implemented NFT marketplace, staking and raffle smart contract using solidity on Ethereum.
- Responsible to design database, implement backend APIs, integrate web3 in backend and dApp side
- Implemented Game-Fi and NFT Staking contract using Rust and Anchor framework on Solana
- Research on Dexes and Implemented FlashLoan Arbitrage bot contract on Ethereum
- Implemented Game-Fi smart contract using cadence and web3 integration on Flow
- Implemented test scripts for smart contract functions and backend APIs
- Responsible to make documentation for APIs using docusaurus etc

EDUCATION

2008 – 2012 Beijing Institute of technology, Computer Science(Bachelor's Degree)

TECH GRID

Golang(6)	React.js/Next(5)	Solidity(3)
Node.js(6)	Vue.js/Nuxt(4)	Rust(2)
Javascript(8)	Angular.js(4)	Cadence(2)
SQL(6)	CSS/SCSS(6)	Web3/Ethers(4)
Python(3)	HTML5/ES6,7(8)	Hardhat/Truffle(4)
Typescript(4)	WebRTC(3)	Anchor, Metaplex, SPL(2)
Php/Laravel(4)	WebSocket(5)	EVM/Solana/Flow/Near(4)
Java(5)	gRPC(1)	AWS/GCP/Azure(5)
C/C++(6)	Bootstrap/Material	Docker/Kubernetes(4)
	UI/Tilewind(6)
