Alex Li

Profile:

Full stack engineer/architect
I have 15+ years development experience with web/app/backend/solutions.
From small project to large one, I attended as developer, architect and PM etc and completed many projects successfully.
Last few years, i built and leaded several projects such as ERP, MES, Travel booking, delivery system and payment service etc and has good experience as remote developer with oversea team members for several years.
I'm passionate engineer, love to learn new technologies and don't afraid new challenges.

I'll try to satisfy my clients with my best and it is just my value and happiness to make client's business success.
