Profile:

Full stack engineer/architect

I have 10+ years experience with web/backend/mobile development.

I worked as developer, architect and team leader etc and completed many projects successfully such as Travel booking services, delivery system, payment service, ERP and MES etc.

Past 6 years I worked as remote engineer and familiar with remote team work and flexible timezone.

I'm a passionate engineer, quick learner and don't afraid of new challenges.

I'll try to satisfy my clients with my best and it is just my value and happiness to make the client's business success.
